Education

Bachelor's Degree

University of Sarajevo

2013 - 2017

The main objectives of the Mechanical Design study program at the Faculty of Mechanical Engineering were targeted at acquiring general and specific competences in the field of mechanical engineering and computer aided design.

Experience

May 2024 - Now

Sarajevo

Software Engineer

Contractor

freelance

Working with international clients on mobile and web application development, with a focus on React, Next.js, React Native, and Node.js. I operate through my registered sole proprietorship Dynamiq, enabling legal and contract-based collaboration with international clients.

AppDelegate (React Native Contractor): Worked on mobile applications such as Airpark and IDPA BiH.

Flowout (Full-Stack Developer): Built Webflow extension apps for well-known clients including Stripe, ActiveCampaign, and PayPal. Also worked on the internal application Syncmate and developed Shopify themes for clients such as Backbone.

April 2022 - May 2024

Sarajevo

Full-Stack Developer

Full-time

Sunray

Responsible for working on both front-end and back-end development processes. Working also as a tech-lead, helping with onboarding new developers. Technologies and Tools: ReactJS, NextJS, React Native, NodeJS, NestJS, MongoDB

Projects:

- Showrunnr - A production management platform for the film industry
- Plenum - A modern blogging platform inspired by Medium
- MySaloon - A mobile app for restaurant and hospitality reservations

Jan 2021 - Aug 2021

Sarajevo

Full-Stack Developer

Contract

freelance

During this period, I dedicated myself to expanding my programming by taking online courses and actively working on web pages for local companies, primarily focusing on applying my skills in React. I immersed myself in learning JavaScript, ReactJS, and Node.js on a daily basis.

This experience allowed me to further enhance my programming expertise while gaining valuable practical experience.

Dec 2018 - Dec 2021

Nova Gorica, Slovenia

Mechanical Design Engineer

Full-time

Gostol

Responsibilities included research for innovation, creating technical documentation, collaborating on machine testing and optimization. I took charge of defining technical specifications and advocating for standardization while showcasing proficiency in Autodesk Inventor and AutoCAD.

Additionally, I actively contributed to our team's productivity by developing macros and small applications aimed at enhancing our machinery development process.

Projects

2025 - Now

Sarajevo

PayPal Webflow App

Developed @Flowout

PayPal

Built a Webflow extension app for PayPal using React, Node.js, PostgreSQL, Drizzle, ngrok, and Tailwind CSS. App allows users to build and manage payment resources. Worked closely with PayPal engineers to deliver core features, improve stability, and ensure smooth integration between Webflow and PayPal services.

2025

Sarajevo

ActiveCampaign Webflow App

Developed @Flowout

ActiveCampaign

Built and launched the ActiveCampaign Webflow app using React, Node.js, Convex, and Axiom. The app includes features such as event tracking, site tracking, and form sync, allowing users to automatically sync Webflow forms with ActiveCampaign contacts for marketing use. Had a great time collaborating with the ActiveCampaign team, and the app was presented at the Webflow Summit in New York.

2025

Sarajevo

Synmate app

Developed @Flowout

Synmate

Built and launched Syncmate, an internal Webflow extension app, using tools and technologies like React, Node.js, Convex, Deno and Axiom. The app allows users to connect APIs, create workflows, schedule tasks, and run data syncs, helping automate integrations between Webflow and external services. Worked closely with the Flowout team to design features and improve reliability.

2025

Sarajevo

Shopify theme development

Developed @Flowout

Backbone

Contributed to migrating Backbone's headless e-commerce platform (Next.js, Contentful, Shopify) to a custom Shopify theme based on the Dawn framework

Implemented smooth animations and interactive UI components using GSAP, enhancing user experience and visual appeal across the storefront.

Worked on proxying parts of the legacy app into the new Shopify setup using Remix, ensuring seamless integration and dynamic content rendering.

2024-2025

Sarajevo

Stripe Webflow App

Developed @Flowout

Stripe

Built and launched the Stripe Webflow app using React, Node.js, PostgreSQL, Drizzle, ngrok, and Docker. The app allows users to create payment links and manage Stripe products directly from Webflow. Collaborated with the team to deliver features, improve performance, and ensure a smooth user experience.

2024 – 2025 Sarajevo

Mobile App Development
Developed @AppDelegate
AirPark

- Enhanced a mobile platform for renting and managing parking spaces by fixing bugs, maintaining code, and developing new features.
- Built a responsive cross-platform interface with React Native, integrating booking flows, payments, and payout management.
- Collaborated with the team to optimize performance, stability, and overall user experience.

2024 Sarajevo

Mobile App Development
Developed @AppDelegate
IDPA BiH

- Developed a React Native mobile app for the IDPA National Championship in Bosnia and Herzegovina, designed as a guide for foreign judges and participants. The app provides event information, locations, and navigation, with content managed via Firebase and support for multiple languages. Worked on app stability, performance, and overall user experience.

2023–2024 Sarajevo

Front-end development
Developed @Sunray
Showrunnr

- Developed numerous features in the app, including: Production Planning, Reservation Management, Shortlisting, Messaging, Crew Inviting
- Utilized technologies such as ReactJS, TypeScript, Apollo Client, GraphQL, MaterialUI, and GO.
- Translated design concepts into functional front-end solutions aligned with the client's vision and requirements.

2023 Sarajevo

Full-stack development
Developed @Sunray
Plenum

- Established frontend architecture with Next.js, TypeScript, and Tailwind CSS, prioritizing reusable components for scalability.
- Built backend infrastructure using NestJS, TypeScript, GraphQL, TypeORM, and MongoDB, emphasizing code reusability and modularity.
- Mentored junior developers working on mobile app using React Native, providing feedback, and aiding in their professional development.

2022 Sarajevo

Mobile app development
Developed @Sunray
MySaloon

- Developed a mobile app for hospitality reservations for restaurants and guests.
- Utilized technologies such as React Native, MongoDB, and REST API.
- Collaborated with product owners to efficiently develop and implement their vision.
- Conducted thorough testing of the app, acting as my own QA to ensure high quality.

2018–2021 Nova Gorica, Slovenia

Macros development
Development @Gostol
Gostol

- Developed numerous macros for R&D CAD teams, reducing repetitive tasks such as replacing title blocks and assigning properties to models and drawings.
- Consolidated existing macros and enhanced functionality using C# with Inventor API Object Model and Windows Forms.
- During my three-year tenure at Gostol, I concurrently worked on numerous projects as a mechanical design engineer. These experiences greatly contributed to the development of my problem-solving and communication skills
